Summary

Front-end developer with strong knowledge of HTML5 / CSS3 / JavaScript and 5+ years of experience in developing web applications, sites and libraries.

Skills

- Creating fast, isomorphic, SEO- and user- friendly, responsive mobile-first SSR SPA/PWAs from scratch using modern front-end stack (react, redux, react-router, node.js, express.js, etc)

- Creating JS libraries and plugins

- Good understanding of React.js and its core principles

- Experience with various react.js components libraries (react-bootstrap, Ant Design, Material UI, etc), i18n libraries (react-intl, i18next), CSSinJS libraries (StyledComponents, Emotion)

- Good understanding of Flux application architecture concepts

- Experience with redux and its ecosystem (react-redux, redux-thunk, redux-saga, reselect, etc)

- Experience with various writing CSS methodologies (BEM, atomic CSS, etc), preprocessors (SASS, LESS, PostCSS) and frameworks (bootstrap, semantic UI, foundation)

- Experience with modern JS build and compile tools (webpack, rollup, gulp, babel)

- Writing unit tests for applications and libraries (using jest, enzyme, etc)

- Using code linting / formatting tools (eslint, stylelint, prettier)

- Experienced with performance optimization (on server (node.js) and client side)

- Creating cross-clients responsive HTML/CSS email templates

- Experience with several design and graphic tools and editors (Figma, Sketch, Zeplin, Adobe Photoshop, Adobe illustrator)

- Experience with version control systems (GIT)

- Good understanding of Agile concepts

Work Expirience

Front-end developer at [Treeum](#) — Nov. 2018 - Jun. 2020

Managed front-end development of the new products of the company. Developed from scratch and maintained several SPA/PWAs (with SSR) and libraries using react.js, redux.js, react-router, react-intl, styled-components, express.js, webpack, etc. Standardized the process of creating and developing new applications and / or libraries by creating boilerplates.

Front-end developer at [SportLabs Group](#) — Aug. 2018 - Nov. 2018

Implemented server-side rendering for SPA using express.js. Transformed SPA to PWA. Increased application performance by use cluster module for parallel processing on server-side, implement code-splitting and auto generating critical CSS for client-side and improve babel and webpack configs.

Front-end developer at [TemplateMonster](#) — Apr. 2016 - Aug. 2018

Developed from scratch and maintained a few SPA using react.js, redux.js, redux-thunk, react-router, redux-form, webpack, babel etc. Developed react.js components library.

Front-end developer at [itsolution.expert](#) — Dec. 2014 - Mar. 2016

Developed front-end (client's personal account website, company's blog website, landing pages, responsive HTML /CSS templates of email letters, etc) for copywriting exchange platform, using pure JavaScript, jQuery, AJAX, WordPress, etc.

Front-end developer at adloud.net — Jun. 2014 - Nov. 2014

Developed front-end for company website home page, blog, and clients personal cabinet, advertising banners constructor, using pure JavaScript, jQuery, AJAX, WordPress, etc. Developed responsive HTML /CSS templates of email letters.

Front-end developer at [StroimWeb](#) — Dec. 2013 - Jun. 2014

Developed front-end and back-end for e-commerce websites, blogs and landing pages using WordPress, internal CMS, php, pure JavaScript, jQuery, AJAX, etc.
